## + PROJECTS

Awaken  
Awaken is an alarm web app that utilizes a raspberry pi to turn on your tv and display custom widgets. - Full Stack Developer - Ruby on Rails, Python, Raspberry Pi, JavaScript/Materialize - [Live](#) | [Github](#) links

Squad  
Squad was developed during the Dev Boot Camp hackathon and was intended to help organize and increase student hackathon participation. The web app utilizes the EventBrite api to locate hackathons near each Dev Boot Camp location. A registered user can click on a hackathon and start a "team", where other users can join. - Full Stack Developer - [Live](#) | [Github](#) links

ME/NU  
ME/NU is a web app for a restaurant, which crowd sources recipes and populates a new menu weekly based on highest user upvotes. - Full Stack Developer - Rails, Heroku, Materialize - [Live](#) | [Github](#) links

seed me seymour gem  
This gem analyzes your schema.rb file and make a seed file with pre-populated seed information using faker. - Backend Logic - Ruby [Live](#) | [Github](#) links

**PROFICIENT::** Java, Python  
**EXPOSED TO::** Angular, React, PHP, Node  
**LANGUAGES::** English, Croatian, Learning Japanese

## + EMPLOYMENT

Levelplaysports.com  
Full Stack Developer  
Jun 2017 to Current  
Levelplaysports.com is in early development that is built on PHP and uses a MYSQL database. I am currently working on Back End algorithms using PHP and node, client side Angular, and Front End UI using CSS3.

Bonelli Widows & Doors      330 Corey Way, SSF  
Supply Chain Coordinator  
Feb 2015 to Jul 2015  
- Conducted analysis that reduced material lead time from 22 weeks to 6 weeks.  
- Triaged entire inventory system including; built a master inventory list, set reorder points, created work order system, procured and maintained lean inventory.  
- Identified problematic areas by performing time trials and managed 17 plant workers to alleviate those problematic areas and increase efficiency.  
- Wrote policy and procedure guides, including: Operations process and procedures guide, safety process and procedure guide.

iHeart Media      340 Townsend St, SF  
Office Administrator  
Dec 2011 to Jan 2015  
- Ad Hoc project management, such as developing and implementing new systems to potentially increase listenership by 40 million people.  
- Established re-order points and developed a system that stabilized month to month inventory acquisitions after performing budget analysis which lead to 10% reduction in purchasing costs.  
- Conducted and analyzed engagement levels which sparked an interest in a mandatory, corporate wide (22,000+ employee), engagement survey. The survey lead to implementation of corporate wide team building events.  
- Negotiated cost saving rates for promotional items in bulk from international vendors, reducing costs by 11%.
