4.0 GPA in both MSOPM & MSDA

Dev Boot Camp
Software Development 2017
- Project-based training program for web development, following MVC design pattern and RESTful architectures
- Developed and maintained web applications with emphasis on Ruby, Javascript, SQL, databases, & test-driven development

✚ PROJECTS

Awaken
Awaken is an alarm web app that utilizes a raspberry pi to to turn on your tv and display custom widgets. - Full Stack Developer - Ruby on Rails, Python, Raspberry Pi, JavaScript/Materialize - Live | Github links

Squad
Squad was developed during the Dev Boot Camp hackathon and was intended to help organize and increase student hackathon participation. The web app utilizes the EventBrite api to locate hackathons near each Dev Boot Camp location. A registered user can click on a hackathon and start a "team", where other users can join. - Full Stack Developer - Live | Github links

ME/NU
ME/NU is a web app for a restaurant, which crowd sources recipes and populates a new menu weekly based on highest user upvotes. - Full Stack Developer - Rails, Heroku, Materialize - Live | Github links

seed_me_seymour gem
This gem analyzes your schema.rb file and make a seed file with pre−populated seed information using faker. - Backend Logic - Ruby Live | Github links
